prevention system

1

Technology First Thinking

Buying AI tools before business problems — building UI wrappers with no vector lakehouse, no CDC, no PII gateway.

\$1.4M wasted on UI wrappers • No Top 20 prioritization

2

No Executive Sponsorship

AI becomes IT initiative not business initiative — No board brief, no Minto Pyramid, no quarterly review.

No board brief • Maps to Nisol 360  Dossier

3

Poor Data Quality

Models only as good as data — No vector lakehouse pgvector/Qdrant, no CDC streaming, no hybrid BM25.

Data Hygiene + Vector cap • Score 

4

Undefined Success Metrics

No measurement of value — No token economics ₹1.80/chunk, no accuracy >95% gate, no NPV/IRR model.

Token Economics cap • CFO DCF inside 360 

5

Change Resistance

Employees don't adopt — No OCM, no skills upskilling, no >40% time reduction target, no no-blame exit.

Culture + Change OCM caps • Lowest scores

6

Pilot Paralysis

Endless pilots never scale — No 4 Go-Live Gates, no PoC Decision Gate, no stop-the-clock mechanism.

Governance cap • Gate 1 Accuracy >95%?

EXECUTIVE INSIGHT

Organizations that focus on business outcomes before technology selection are significantly more likely to achieve measurable ROI — maps to **Nisol 360™ 4 Gates** day 1 governance. Quick Wins first (Spark) funds Strategic Bets (Pro). (Spark) funds Strategic Bets (Pro).
